EXAMINER

DETAILED ACTION

This Office Action is in response to the application filed June 11, 2004.

Allowable Subject Matter

Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose, make obvious, or otherwise suggest the structure of the applicant's together with the other limitations of the independent claims, such as the at least one underlap region adjacent to the channel doping region positioned between either a source extension or a drain extension and said channel doping region which does not underlap the boundaries of the gate electrode, wherein either a resistance region of said underlap is no more than 30% of an ON-state resistance of said channel doping region, or the underlap region has a doping level no more than $1 \times 10^{17}/\text{cc}$ over a lateral thickness equal to or greater than a thickness of the gate insulator. The dependent claims being further limiting and definite are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patents are cited to further show the state of the art with respect to field effect transistors having underlap regions:

Bae et al. (US 6,917,085 B2)	Cheek et al. (KUS 6,316,302 B1)
